

BHUWAN BHANDARI

Senior System Administrator | DevOps Engineer | Network Engineer

Kathmandu / Lalitpur, Nepal | Open to Nepal, UAE, remote, and relocation opportunities

thebhuone@gmail.com | linkedin.com/in/bhuwan-bhandari-83214631b

PROFESSIONAL SUMMARY

Infrastructure and DevOps professional with 8+ years of hands-on experience supporting production Linux and Windows environments, cloud and virtualized infrastructure, enterprise networking, application deployment, CI/CD, monitoring, backup, and disaster recovery. Builds reliable, secure, and observable systems; automates recurring operations; and leads practical troubleshooting and recovery for business, public-sector, healthcare, education, and CRM platforms.

CORE SKILLS

Systems: Linux, Ubuntu, CentOS, RHEL, Windows Server, server hardening, Bash, Python, PowerShell

DevOps and Delivery: Jenkins, GitLab, Azure Pipelines, Docker, Kubernetes, CI/CD, Nginx, Apache, Tomcat, Gunicorn

Cloud and Virtualization: AWS, Azure, Google Cloud, Oracle Cloud, EC2, S3, CloudWatch, VMware ESXi, Proxmox VE, Hyper-V

Networking and Security: FortiGate, MikroTik, VPN, VLAN, routing, NAT, firewalls, monitoring, incident response, backup and disaster recovery

Data and Observability: MariaDB, MySQL, PostgreSQL, Zabbix, CloudWatch, log rotation, recovery procedures

PROFESSIONAL EXPERIENCE

Senior System Administrator and DevOps Engineer

Infrastructure, cloud, and application operations

Nov 2018 - Jul 2024

- Managed Linux and Windows production infrastructure across cloud, VPS, and dedicated server environments.
- Built and operated Jenkins and Git-based deployment workflows for Nginx, Apache, Tomcat, Gunicorn, Django, React, Grails, and Java applications.
- Administered databases, backups, monitoring, recovery operations, and production incident response for government, healthcare, education, CRM, business, and network operations environments.
- Automated recurring operational work with Bash, Python, and PowerShell; documented recovery procedures and production runbooks.
- Supported virtualization, cloud operations, application availability, capacity planning, and disaster-recovery readiness.

IT Manager

Infrastructure and network operations

Jul 2021 - Jul 2024

- Led infrastructure planning, operational troubleshooting, and recovery procedures for production systems.
- Managed FortiGate firewalls, VPNs, VLANs, network health, routing, NAT, and production incidents.
- Improved reliability through monitoring, operational automation, backup practices, and incident follow-up.

Assistant Network Administrator / Assistant Network Engineer - Internship

Enterprise connectivity and network support

Apr 2018 - Oct 2018

- Supported MPLS VPN and SBI VPN infrastructure, enterprise connectivity, network administration, and fault troubleshooting.

SELECTED INFRASTRUCTURE DELIVERY

Municipal Digital Platform: Supported infrastructure for a government platform serving 40 municipalities and approximately 35 application modules.

NIRC CRM: Managed production deployment and infrastructure for Django, Unicorn, Nginx, and MariaDB services.

CentOS Root Partition Recovery: Protected application and database data, recovered partition configuration, expanded the root filesystem, and introduced log rotation, cleanup, maintenance automation, and improved backup procedures.

EDUCATION

PRIST University | 2014 - 2018

Pyramid International Higher Secondary School | +2 Science | 2010 - 2012
