

Bhuwan Bhandari

System Administrator | DevOps Engineer | SysOps | DevSecOps

Email: thebhuone@gmail.com
Location: Nepal | Open to Remote Roles
Portfolio: Infrastructure Control Panel
Availability: DevOps, SysOps, DevSecOps

System Administrator and DevOps Engineer with 8+ years of experience operating production infrastructure, government server environments, AWS workloads, Linux and Windows systems, VPN networks, virtualization, CI/CD pipelines, monitoring, security hardening, and incident response. Strong fit for System Administrator, DevOps Engineer, SysOps Administrator, Cloud Operations, Infrastructure Engineer, and DevSecOps roles.

CORE TECHNICAL SKILLS

Operating Systems	Linux, RHEL, Ubuntu, CentOS, Windows Server 2016/2019/2022	Cloud	AWS EC2, S3, IAM, CloudWatch, VPC, security groups
DevOps	Jenkins, GitLab CI, Bitbucket Pipelines, Git, Docker, release automation	SysOps	Monitoring, backups, uptime, capacity, incident triage, service recovery
DevSecOps	IAM, patching, audit logs, access control, server hardening, firewall policy	Networking	VPN, MPLS, BGP, DNS, DHCP, Active Directory, Cisco, IPSec
Virtualization	VMware, Proxmox, server consolidation, lab environments	Automation	Bash, Shell scripting, Python, PowerShell, operational runbooks

PROFESSIONAL EXPERIENCE

NIRC - System Administrator / DevOps Engineer2019 - Present

Government infrastructure, server administration, AWS operations, CI/CD, monitoring, security controls

- Administer and maintain 25+ production servers across Linux and Windows Server environments.
- Manage AWS infrastructure including EC2 instances, S3 storage, IAM access, security groups, and CloudWatch monitoring.
- Build, operate, and troubleshoot CI/CD pipelines using Jenkins, GitLab CI, and Bitbucket Pipelines.
- Implement patch management, backup verification, server hardening, and access control practices.

- Manage DNS, DHCP, Active Directory, Windows Server services, and enterprise user administration.
- Operate VMware and Proxmox virtualization environments for server consolidation and lab workloads.
- Automate routine operational tasks with Bash, Python, and PowerShell scripts.

BSNL - Network / VPN Administrator

2016 - 2019

Telecom network operations, banking VPN infrastructure, MPLS, BGP, WAN monitoring

- Maintained VPN infrastructure for SBI banking connectivity across enterprise branch networks.
- Supported MPLS and BGP routing for secure inter-site communication and network reliability.
- Performed network fault isolation, link health checks, incident escalation, and Tier-2/Tier-3 troubleshooting.
- Monitored WAN link utilization, circuit availability, service quality, and SLA-related operational events.
- Supported banking-grade network security practices and secure remote connectivity standards.

SELECTED INFRASTRUCTURE PROJECTS

AWS Multi-Tier Deployment

Cloud Infrastructure

- Designed a multi-tier AWS deployment using EC2, RDS, S3, CloudFront, IAM, security groups, and CloudWatch alarms.

Linux Server Hardening Lab

DevSecOps / Security

- Created repeatable hardening practices for SSH, firewall policy, fail2ban, auditd, patching, and CIS-style baseline checks.

Active Directory + DNS Lab

Windows Server / Identity

- Built enterprise identity simulation with domain controllers, OU structure, GPOs, DNS zones, DHCP scopes, and VMware.

CI/CD Pipeline Control Plane

DevOps Automation

- Configured build, test, deploy, and rollback workflow using Jenkins, GitLab CI, Docker, Bash, and SSH-based deployment.

ROLE KEYWORDS

System Administrator, Linux Administrator, Windows Server Administrator, DevOps Engineer, SysOps Administrator, Cloud Operations Engineer, Infrastructure Engineer, DevSecOps Engineer, Network Administrator, AWS Administrator, CI/CD Engineer, Site Reliability Operations, Server Hardening, Monitoring, Incident Response, IAM, VPN, VMware.
